

# **MINISTRE DE L'EDUCATION NATIONALE ET DE L'ENSEIGNEMENT TECHNIQUE**

**REPUBLIQUE DE COTE D'IVOIRE**

**ICT INTEGRATION INTO EDUCATION**

# POLICAL, SOCIAL AND ECONOMIC ENVIRONMENT

In 2012, this is how Cote d'Ivoire and its education system were:

- A Country coming out of 10 years of war, distrust and instability
- Very little investment in Education during past 10 years
- Schools destroyed and equipments stolen
- Low Academic achievements because of interruptions of the school years
- Overcrowded schools
- Lack of teachers and demotivated teachers
- Lack of ethics and morality in the schools
- In other words, an education system is a bad state

# POLICAL VISION

The vision of the current government is to close this huge gap and take a leap forward. To achieve that, the government had decided to reform the system and allocate a huge chunk of its budget and efforts to it.

- More than 15,500 primary school teachers were hired
- More than 7,000 secondary school teachers were hired
- Rehabilitated thousands of schools and built hundreds of new classes
- Re-instated the uniform and restored discipline and order
- It made education free for all children
- More than 50 Billions CFA additional monies were invested into education
- **It took the bold step of making the integration of ICT into the system a top priority**

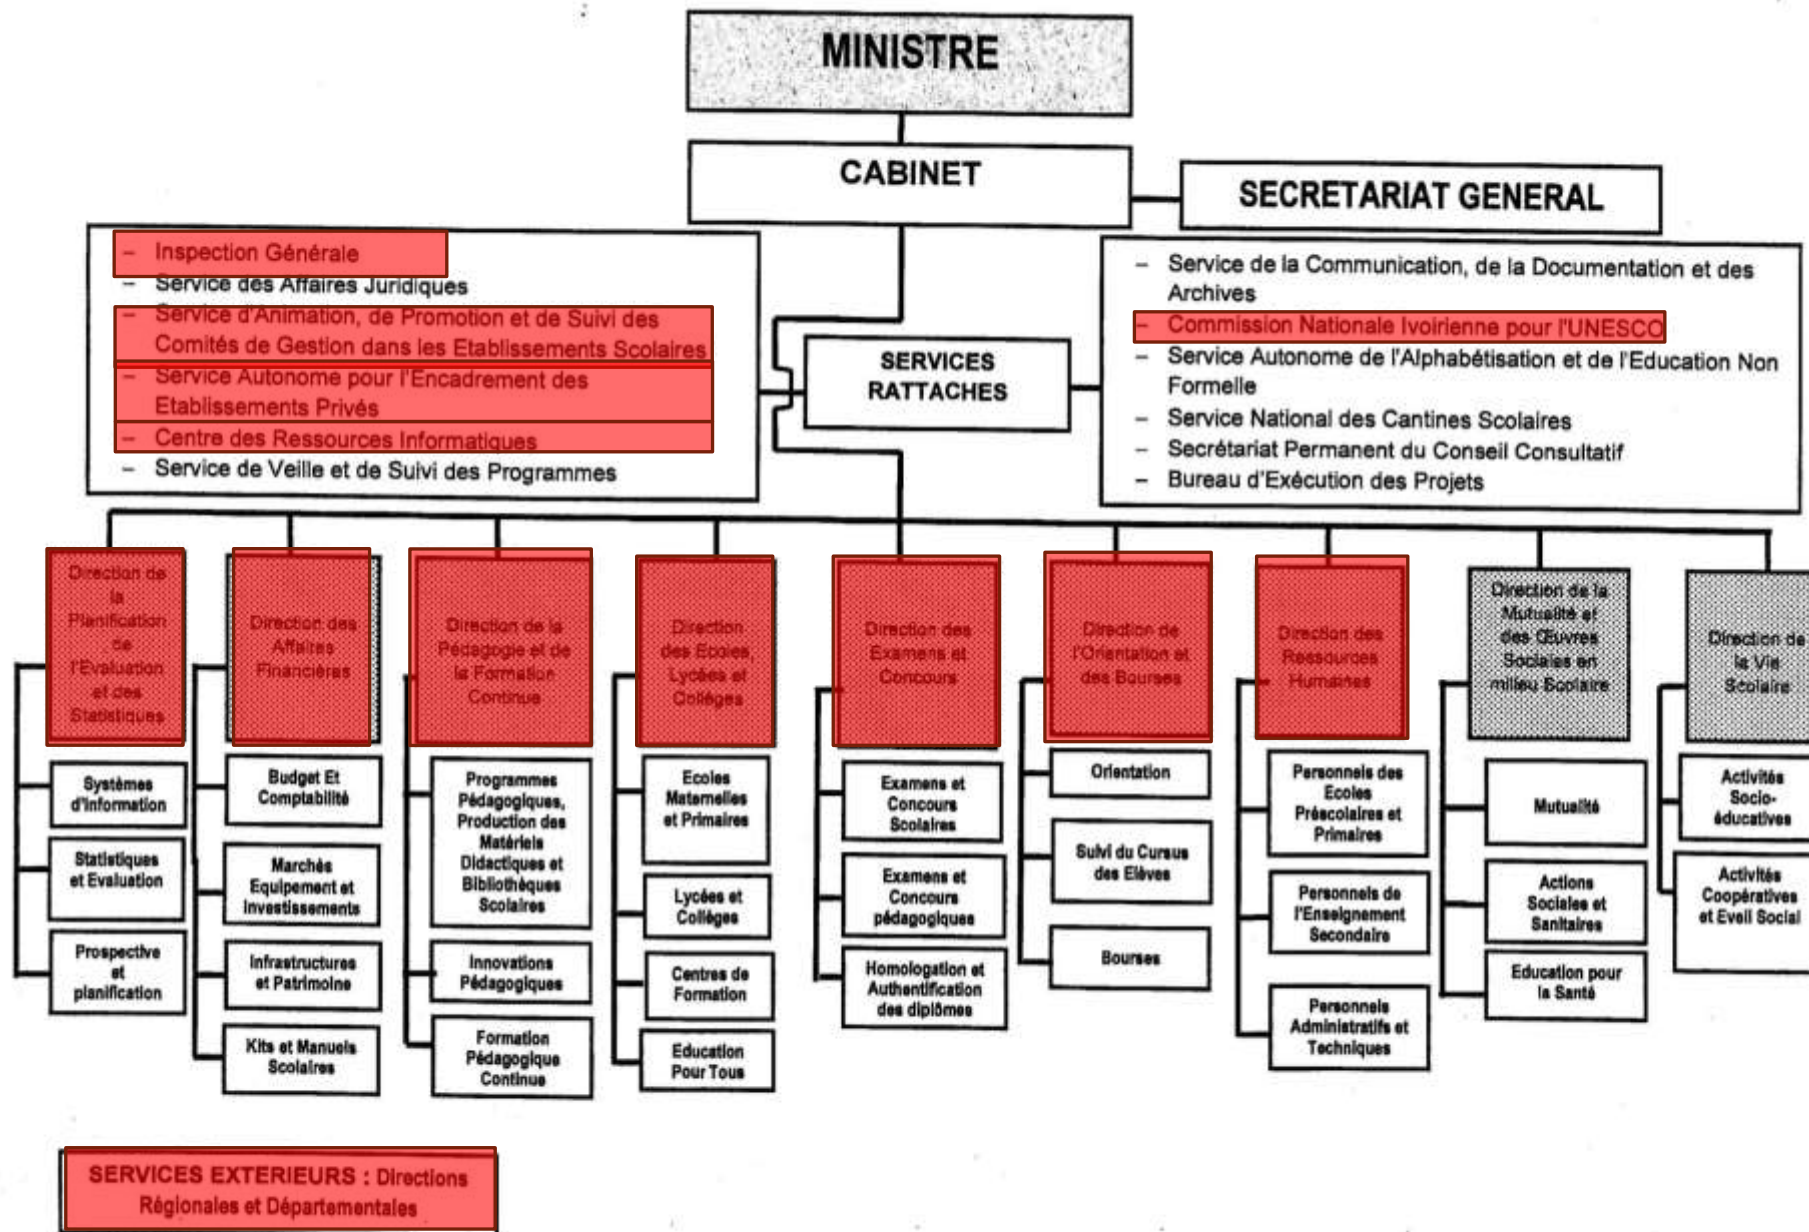

# GOVERNMENT ICT POLICIES

The broad Government ICT policies were put together by the Ministry of ICT in collaboration with the other Ministries, the Private sector and NGOs.

A new Telecom Code was signed into Law:

- It created the eGouv Project with spin-offs Sectorial programs such as eEducation
- These programs are entities of ANSUT (the Universal Acces Funds)
- ANSUT was restructured to fit into the new vision and became fully operational only three months ago
- ANSUT was tasked by the Government to finance ICT projects such eEducation, eHealth, eAgriculture, etc
- A Decree was signed into Law to make ICT the 14th Subject Matter in the School System

## SOME NUMBERS ON THE MINISTRY

Le **M**inistère de l'**E**ducation **N**ationale et de l'**E**nseignement **T**echnique est structuré de la façon suivante :

- One (1) Cabinet
- Twelve (12) Services rattachés,
- One (1) Secrétariat Général,
- Nine (9) Directions centrales,
- Thirty Six (36) Regional Departments and (5) Departemenatl Offices
- Hundred and Eighty-six (186) Primary Education Inspections Inspections
- Forteen (14) Teacher Training Schools
- Fifteen Thousand (15.000) schools
- More than 90.000 employees with more than 70.000 active teachers
- More than four millions (4.000.000) students

# WHAT DOES INTEGRATING ICT INTO SUCH A MASSIVE AND COMPLEX SYSTEM MEAN?

It means:

- Computerizing all the administrative offices (Cabinet, Central and Regional Departments, Primary, Junior and High Schools)
- Integrating ICT into Pedagogy and Training
- Teaching ICT Skills to all students no matter what their future areas of work might be

# WHAT DOES COMPUTERIZING THE ADMINISTRATIVE OFFICES MEAN?

It means:

- Cabling the offices and bringing 3G or high-speed Internet Access and WIFI connectivity to them
- Bringing Professional Email and other productivity tools such as Web presence and video conferencing to them
- Providing them with Student/School Management Solutions to them
- Providing Datawarehousing, Better Statistics and BI Capabilities to decision makers

# WHAT DOES INTEGRATING ICT INTO PEDAGOGY AND TRAINING MEAN?

It means:

- Providing digital multimedia books and tools
- Building computer labs with interactive classroom solutions using digital multimedia contents with the goal of enhancing teacher and student experiences
- Providing students the ability to study anywhere and anytime
- Providing teachers 21st century teaching skills
- Providing students 21st century learning environment
- Providing teachers on-the-spot student evaluation possibilities
- Giving every student and teacher the opportunity to enter into the digital age

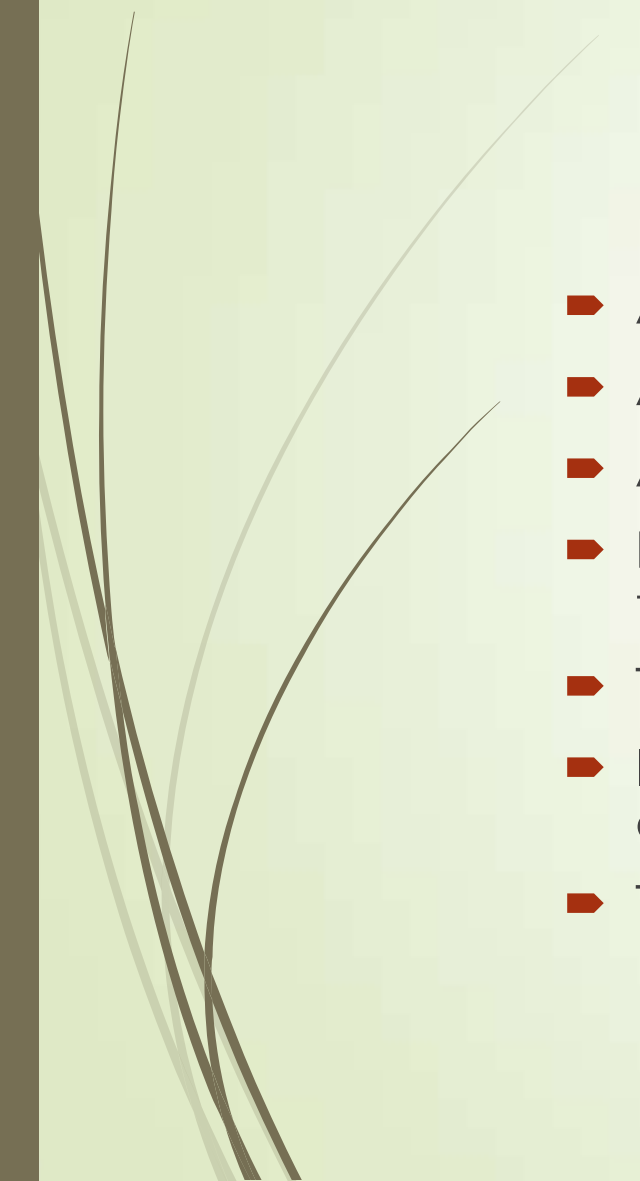

# WHAT DOES TEACHING ICT SKILLS MEAN?

It means:

- Providing every school children the necessary ICT skills they need to enter into the digital age no matter what their career choices may be in the future
- Giving every school children the opportunity to touch and feel technology, use it on a daily basis for their classes and projects
- Bridging the digital gap between rich and poor, city students and country-side students

# CURRENT ACHIEVEMENTS

- A strategic ICT Integration into Education Plan has been put together
  - A pilot program in 30 education facilities in progress
  - A Second Pilot of 100 facilities is in the works
  - Private partners such as MTN, Haier and Samsung have equipped more than 50 schools
  - The National Fiber Optic Backbone construction is ongoing
  - Internet Access and professional emails have been provided to some administrative offices
  - The Ministry and some departments have web sites
- 

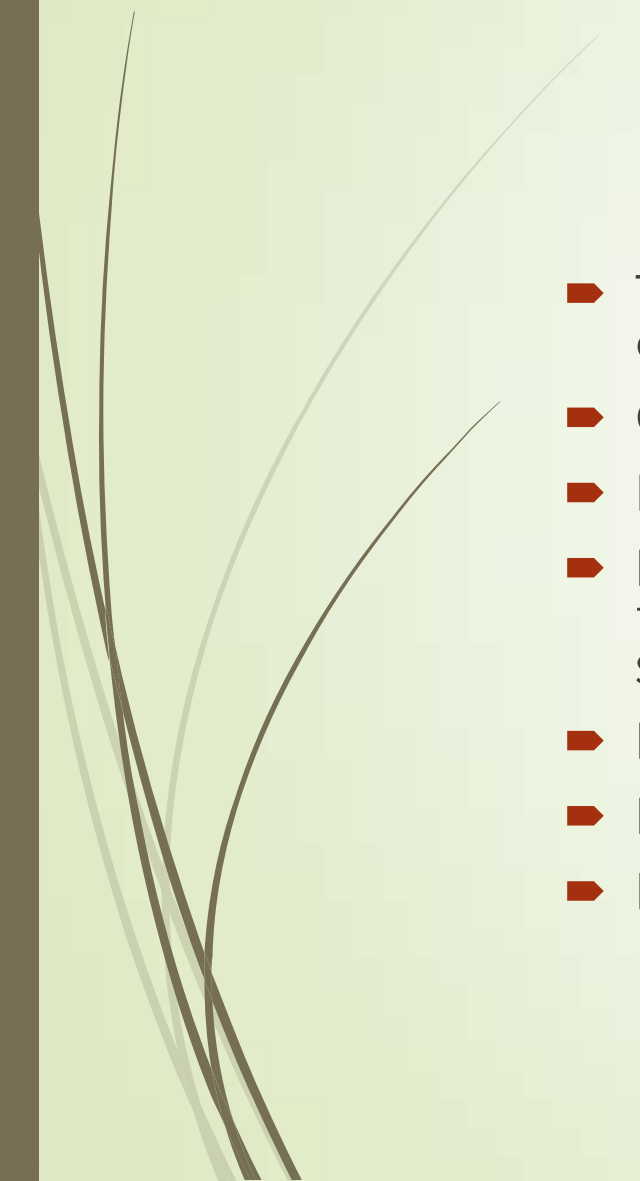

# CURRENT ACHIEVEMENTS

- Student School signed process is now done online, thus reducing corruption and thefts and school to start ontime in September
- Every department is trying to develop its own database and system
- Some schools are paying for their own Internet connections
- IFADEM- Distance Training for Primary School Teachers is ongoing
- CFIT-UNESCO- Secondary Teacher Distance Training is ongoing
- The Minister and most of the Directors today have their tablets and communicate by email

# CHALLENGES

- 
- Teacher and administrative staff training on ICT lagging behind thus affecting the adoption of the project by those stakeholders
  - Community involvement not included enough in the process
  - RFP process too long and ineffective
  - Lack of desire of the department heads to give up their control over their silos and thus impeding the ability to standardize, consolidate, share and make informed decisions
  - Lack of discipline in the management of ICT resources
  - Energy issues in remote areas
  - Budget issues

# CHALLENGES

- 
- Collaboration issues with the Ministry of ICT and the other education Ministries
  - Lack of content issues

# OPPORTUNITIES

- Opportunity to take a leap and close the huge gap created by the war
- Opportunity to standardize, consolidate and provide reliable data and statistics for timely and informed decision making
- Opportunity to minimize the effects of the lack of teachers and overcrowding of schools by providing access to digitized educational contents online
- Provide world-class skills to our students and prepare them for competition on the world stage, in the new economy
- Turned the political will into concrete results
