

Mukom Akong Tamon is Training Manager at the African Network Information Center (AFRINIC) based in Mauritius which he joined in 2009. He designed, developed and runs AFRINIC's home-developed IPv6 training program which is one of the best in the world. This program has trained more than 1000 network engineers in 35+ countries on the skills needed to plan and deploy next-generation IPv6 networks. He is also the author of AFRINIC's "IPv6 Strategy & Planning" aka "IPv6 for Managers" course as well as author of the IPv6 Forum "IPv6 for Systems Engineers" program - a global program whose aim is to standardise the training of systems engineers in developing IPv6 services.

Prior to joining AFRINIC, Mukom worked at Kaduna Business School, Ahmadu Bello University - Zaria, the United Nations Development Program and volunteered for the ICT Forum of Nigeria. In these roles, Mukom has designed and taught more than 700 managers and executives on how to use IT effectively in their organisations as well as Project Management, Systems Thinking and Six Sigma. His experience over the past 10 years thus spans management consulting, Information Technology, Education and Global development industries.

In his spare time, he blogs at perfexcellence.org, techxcellence.net, and tweets as @Perfexcellent
